

Smart City Project

You will get two option i.e

- Administration
- visitor

For administration:

You will get login and signup option

To signup enter your username and password

To login enter your username and password

Once it is confirmed, select your domain and enter details for the selected domain

Then you will get a view details option to view the details you had entered

For visitor:

You will get login and signup option

To signup enter you name and password

To login enter name and password

Once it it confirmed select your domain

And search what you want to from the selected domain

Your desired data will be viewed

There is a back and exit option as well in the program
